

# Sealweld Virtual Valve Training

## Valve 101

Sealweld and CR Wall are excited to offer this live and interactive training program designed to introduce and instruct operations personnel on the safe and effective method of servicing in-line valves. This training will not only help prolong valve life, but will also help ensure the safety, integrity and performance of your gas distribution system.

Instructed by Joe Pirkl, Sealweld's Global Training & Technical Program Director, this two-session training course is ideal for DIMP, engineering, operations, construction, safety, training and compliance personnel.

## Course Overview

### Day 1: Introduction to Ball, Gate and Plug Valves

- Valve Identification
- Valve Terminology
- Fitting Identification
- Valve Operation
- Common Valve Components

### Day 2: Valve Maintenance Best Practices

- Valve Maintenance Inspection
  - Leaks
  - Corrosion
  - Abnormal Operation Conditions
- Product Capacity During Maintenance
- Calculating Injection Pressures
- Troubleshooting
- Plus Other Field Proven Best Practices

**When** Day 1 – March 30, 2021: 10:30am – 2:30pm EST  
Day 2 – March 31, 2021: 10:30am – 2:30pm EST
